

APPLICATION FORM

PtL Pioneer Plant at Industrial park Höchst

Frankfurt (Main)

INERATEC plans to build an industrial pioneer plant for the production of sustainable synthetic fuels. From up to 10,000 t of biogenic CO₂ and renewable electricity, up to 3,500 t or 4.6 million liters of INERATEC e-Naphtha, e-Diesel and wax are produced annually.

On a Fischer-Tropsch (FT) basis, the pioneer plant produces a range of sustainable fuels (FT diesel) and synthetic chemicals (FT naphtha and FT wax). The clean FT-diesel has drop-in quality and can be used directly in cars and trucks. The FT naphtha and FT wax fraction can subsequently be converted to CO₂-neutral gasoline, e-kerosene and other synthetic products. In particular, sustainable e-kerosene applies to the aviation industry as a promising solution for climate protection.

If you are interested in a product offtake (minimum quantity 500,000 l/year), please fill out the following form and send the document to sales@ineratec.de, alternatively by post to INERATEC GmbH, Siemensallee 84, 76187 Karlsruhe:

Name _____	We're interested in... <input type="checkbox"/> INERATEC FT-Naphtha <input type="checkbox"/> INERATEC FT-Diesel <input type="checkbox"/> INERATEC FT-Waxes _____ _____ _____ _____ _____ Further information about the products are provided in the tender documents.
